

JOB TITLE:

Consulting Architect

ROLE PURPOSE:

To work across a range of engagements delivering value for our clients, typically focused on longer term assignments across a range of industries and technical environments with occasional very short and intense consulting engagements.

REPORTS TO:

Director of Delivery

MAIN RESPONSIBILITIES:

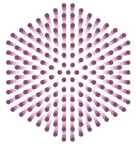

- To perform a wide range of activities as required by the engagements and clients we serve, including Architecture, Project Management, Analysis and Development activities across a variety of projects
- To solve business problems for Mosaic Island's clients through the use of key skills
- Mentor and develop other Mi employees and associates
- Contribute to the Mi Knowledge Network
- To assist with interviews where appropriate
- To lead or be an integral part of one of our engagement delivery teams
- To help refine our practices, grow our collateral and develop our propositions in support of delivery to clients

EXPERIENCE & SKILLS:

- You will already have a good base of consulting skills, gained from previous consulting roles which will allow you to be great at business requirements extraction and working comfortably at both a business and technical level.
- Good understanding of the end to end software delivery lifecycle, in particular the business requirements to solution design area
- Commercial acumen and understanding of basic project finance
- You may know several technology areas really well and are self motivated to research and keep up to date in your own time.

PERSONAL SPECIFICATION:

- Strong interpersonal skills - Able to engage at all levels of an organisation (from CxO to developer)
- Develops a strong level of trust and influence
- Exudes confidence and expertise
- Strong leader with experience of managing a team of IT professionals
